# Standard Pump Packages

## Standard Pump Packages

Systecon Standard Packages provide indoor comfort systems and comprehensive facility solutions for institutional, commercial, and industrial uses. By combining components into standard configurations, Systecon is able to offer a product that costs less, and requires less time to manufacture.

All Systecon Standard Packages come with factory-mounted controls for pump sequencing and remote monitoring. Major system components include pumps, variable speed drives, headers, and structural steel bases.

## Systecon Standard Package Applications

- Variable Primary Flow Systems
- Primary/Secondary Systems
- Condenser Systems
- Dual Use Primary/Condenser Systems
- Water Source Heat Pump Systems

## Features & Benefits

- Design Flexibility
  - Constant Speed Pump Packages
  - Variable Speed Pump Packages
  - Variable Speed Pump Primary Flow Pump Package
- Factory Built
  - Pre-engineered and built within a controlled environment by experienced personnel
- Zero tolerance performance test
- Factory Mounted Controls
  - Systecon's SCRIPT PLC-based controls
- Simplified Field Installation
  - Complete Plug and Play System
- Low Installation Costs
  - Requires less time and materials
- Reduced Space Requirements
  - Typically requires significantly less space than field built systems
- Single Source Warranty
